

# NEET 2027

## REPEATERS COURSE

**One Year. One Focus. One MBBS Seat.**

**20+ Years**  
Experienced  
Faculty

**Small Batch**  
Size – Only 36  
Students

**AI-Powered**  
Performance  
Tracking

**Structured**  
Testing System

## Our Campuses

- **Adyar**
- **Anna Nagar**
- **Pallikaranai**  
Girls Residential Campus

# Why VVT is the Right Choice for Repeaters

## Expert Faculty (20+ Years Experience)

Learn from highly experienced NEET faculty who focus on concept clarity + NEET-level problem-solving + scoring strategies for repeaters.

## Unique Testing System + AI Analysis

We follow a strict improvement cycle:  
Teach → Test → Analyse → Correct → Improve  
With AI-based reports, students clearly know where marks are lost, what to revise, and what to practice next.

## Small Batch Advantage

Small batches ensure better attention, closer monitoring, and faster improvement.

## Personalized Mentoring

Every student gets personal guidance based on performance—weekly targets, revision plan, and error correction—so preparation stays on track throughout the year.

# AI-Powered Analysis That Improves

Not just marks – we show exactly what to fix next.

**With every test, our AI:**

➤ **Pinpoints weak chapters & sub-topics**

(exactly where marks are lost)

➤ **Identifies weak question types**

(Numericals / Assertion-Reason / Case-based / Diagrams)

➤ **Explains why marks are lost**

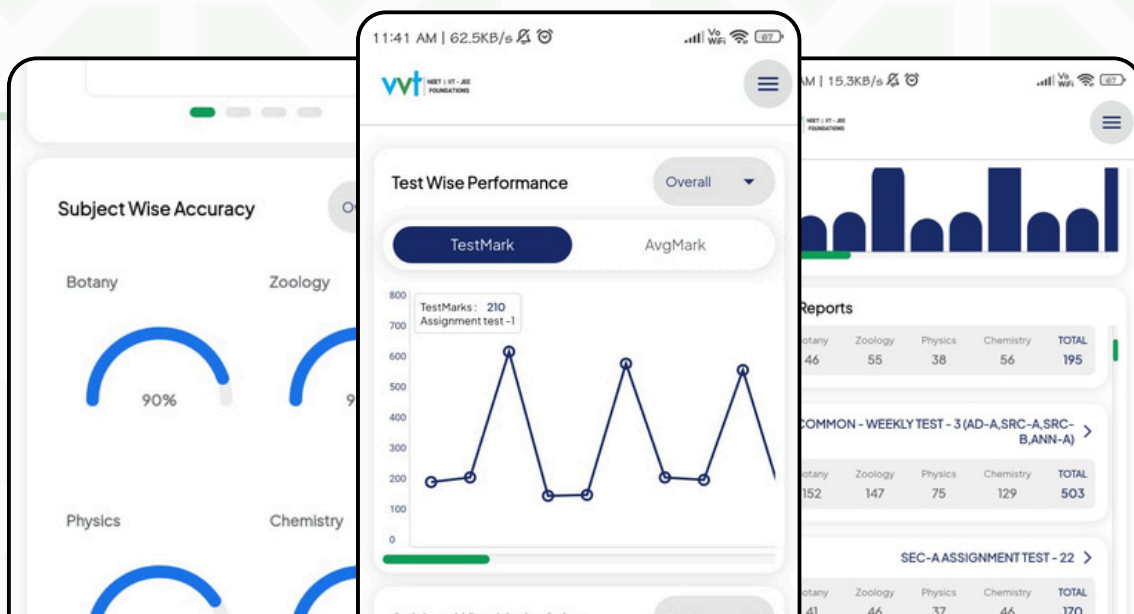

(concept gap / time pressure / silly mistakes / guesswork)

➤ **Creates a personalised “Error Test”**

automatically based on recent performance

➤ **Triggers faculty + 1-on-1 mentoring plan**

(what to revise, what to practice next)

# The "No-Mistake" Testing System

## Daily Practice Tests

Focused chapter-wise and concept-wise tests to build daily speed.

## Weekly NEET Model Tests

Full-length exams conducted every Sunday to enhance time management.

## Cumulative Tests

Held every three weeks to reinforce long-term retention of previously learned topics.

## Grand Tests

Full-syllabus simulation exams before the final NEET to develop peak confidence.

## AI-Powered "Error Tests"

The system reviews your performance from the past five weeks to create a unique test containing only your weak areas and unattempted questions.

## Turning Setbacks into Medical Seats.

### A Year of Strategic Growth, Not Just Repeating.

The Repeater year is both an academic and emotional marathon.

Our VVT system is uniquely structured to manage this journey, transforming unsure students into confident doctors.

### Our 3-Phase Transformation Model

#### > Phase 1: Diagnosis & Reset

- **The Focus:** Using detailed AI analysis to pinpoint every single hidden gap in conceptual knowledge.
- **The Result:** A fresh start with a clear understanding of foundational concepts.

#### > Phase 2: Consistency & Accuracy

- **The Focus:** Building the strict daily routine of disciplined study, tests, error-correction exams, and expert doubt clearing.
- **The Result:** Consistent score improvement through systematic habit correction.

#### > Phase 3: Peak Performance

- **The Focus:** Mastering the mental game of the exam through competitive Grand Test simulations and targeted fast-track revision.
- **The Result:** High confidence and peak exam temperament for the final NEET.

# YOU'RE NOT REPEATING. YOU'RE REBUILDING FOR SUCCESS.
